

Application method

Disinfecting cleaning

Occupational safety

Follow operating instructions.

Use personal protective equipment!

Follow the skincare plan!

Step 1: Dosing and preparing of the ready-to-use solution

First add water, then add the correct amount of disinfectant, following the dosage instructions on the label and product information sheet. Always use cold water!

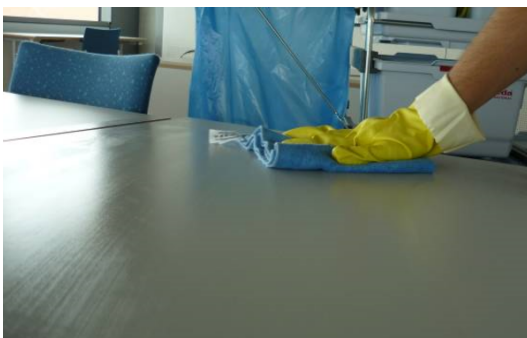

Follow operating instructions. Wear personal protective equipment.

Use biocides safely. Always read the label and product information before use.

Step 2: Soak and fold the cloth

Soak a clean cloth in the disinfectant solution and wring out. Fold cloth as described. The folding method creates 8 working areas to use. Use fresh cloths in each room.

Step 3: Disinfect surfaces systematically

Clean and disinfect surfaces in a systematic way using a folded cloth. Ensure the entire surface is covered. Remove visible dirt and contaminations with a cloth that has been soaked in disinfectant. Then wash cloth with laundry. Then fully clean and disinfect surfaces with a fresh cloth that has been soaked in disinfectant. Cloths should be washed with laundry.

The safety advice and instructions for use on the containers, the product information and the safety data sheet must be observed. Please also observe the cleaning and maintenance recommendations of the manufacturers as well as the instruction manual of the machines and equipment used.

Application method

Disinfecting cleaning

Step 4: Rapid disinfection of specific areas

Fully cover surfaces, devices and objects with the undiluted product and keep moist during the reaction time.

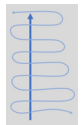

Step 5: Wipe and disinfect floor areas systematically

Place warning signs!

Attach mop.

Lay "waterway".

Clean the surface in overlapping loops (figure of 8). Use fresh mop if necessary. Use fresh mops in each room.

Step 6: Clean tools

Empty bucket after work. Disinfect all equipment used. Disinfect cloths and mops.

The safety advice and instructions for use on the containers, the product information and the safety data sheet must be observed. Please also observe the cleaning and maintenance recommendations of the manufacturers as well as the instruction manual of the machines and equipment used.
