

Application method

Removal of rust stains with RuginOff

RuginOff can be used to remove rust from acid-sensitive and acid-resistant materials and surfaces.

Step 1: Preparation

Make sure you have a dustpan and brush, hand pad, brush, cloths, a bucket of water and RuginOff to hand. Cordon off the area you wish to clean. Use personal protective equipment!

Step 2: Remove coarse dirt

Sweep or vacuum to remove coarse, loose dirt.

The safety advice and instructions for use on the containers, the product information and the safety data sheet must be observed. Please also observe the cleaning and maintenance recommendations of the manufacturers as well as the instruction manual of the machines and equipment used.

Application method

Step 3: Spray onto rust stain

From a short distance, spray RuginOff onto the rust stain. Allow to act for a short time. Do not allow the cleaning solution to dry!

Step 4: Manual scrubbing

Colour indicator shows the onset of the reaction through a purple colouration of the cleaning solution. Manually scrub the loose dirt with a brush or pad.

Step 5: Loose dirt

Remove the loose dirt with a microfiber cloth or disposable towel.

The safety advice and instructions for use on the containers, the product information and the safety data sheet must be observed. Please also observe the cleaning and maintenance recommendations of the manufacturers as well as the instruction manual of the machines and equipment used.
