

Application method Glass cleaning

Occupational safety

Pay attention to the regulations on fall protection and when dealing with aerial lifting technology. Use personal protective equipment!

Step 1: Dose, prepare ready-to-use solution

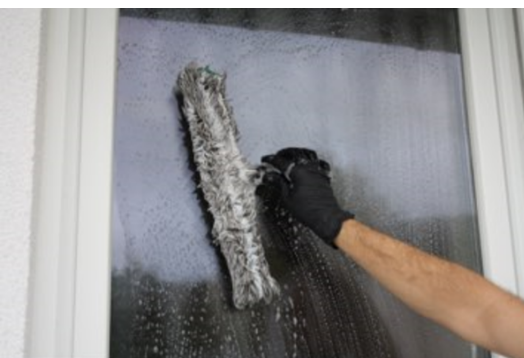

First add water, then add the correct amount of detergent, following the dosage instructions on the label. Always use cold water!

Follow operating instructions. Wear personal protective equipment.

Step 2: Rinse washer and cleaning cloth

Rinse the cloth in cleaning solution and wring out. Submerge the washer in cleaning solution and press out. The washer should not drip afterwards.

Step 3: Wet glass surface

Cover the glass surface to be cleaned entirely with cleaning solution.

The safety advice and instructions for use on the containers, the product information and the safety data sheet must be observed. Please also observe the cleaning and maintenance recommendations of the manufacturers as well as the instruction manual of the machines and equipment used.

Application method

Glass cleaning

Step 4: Clean window rabbet

Use vacuum cleaner, brush or hand broom to remove coarse dirt. Remove remaining dirt with a microfiber cloth.

Step 5: Clean window frames and cases

Clean window frames and cases with a folded microfiber cloth. Use a scratch-free sponge pad to loosen stubborn dirt and then remove loosened dirt with a microfiber cloth.

Step 6: Squeegee glass surface

If required, wet glass surface again as described in Step 3.

Then use a squeegee to clean glass surface from top to bottom, using "S" movements. Mop up dripping cleaning solution with the washer while wetting in order to prevent the cleaning solution from dripping onto furniture, window sills and floor coverings.

Tip:

Check the squeegee rubber regularly for damage. You can only achieve streak-free cleaning results if the squeegee rubber is undamaged. If damaged, reverse or replace the squeegee rubber.

Application method

Glass cleaning

Step 7: Wiping of the window with polishing cloth

Use a polishing cloth to fully remove any remaining cleaning solution from edges, corners and rims.

Step 8: Cleaning of the window sill

Clean window sill with a folded microfiber cloth. Absorb any drips from furniture, façade elements or floor coverings.

Step 9: Clean tools

Rinse out the bucket and tools with water, and dry afterwards. Rinse cleaning textiles with water and then wash in laundry machine.

The safety advice and instructions for use on the containers, the product information and the safety data sheet must be observed. Please also observe the cleaning and maintenance recommendations of the manufacturers as well as the instruction manual of the machines and equipment used.
