

Application method Foam cleaning

Occupational safety

Follow operating instructions.

Use personal protective equipment!

Follow the skincare plan!

Step 1: Preparation

Remove all moisture-sensitive materials and electronic devices from the working area. Tape light switches and plug sockets if necessary.

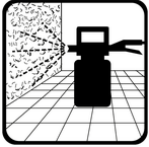

Step 2: Preparing of the foam gun

Fill foam gun container with undiluted detergent.
Connect foam gun to the water hose.

The safety advice and instructions for use on the containers, the product information and the safety data sheet must be observed. Please also observe the cleaning and maintenance recommendations of the manufacturers as well as the instruction manual of the machines and equipment used.

Application method Foam cleaning

Step 3: Protect acid-sensitive materials!

When using acid detergents, acid-sensitive materials such as jointing material need to be covered with clear water in order to protect them from the acid.

Select dosage level "0" on the foam gun for clear water.

Step 4: Apply the cleaning solution

Protect acid-sensitive materials!

Set the dosage level according to dosage instructions. Foam the surface from the bottom up. Allow the cleaning solution to act for a short time.

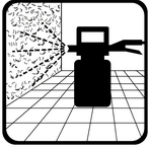

Step 5: Scrubbing the surface

Use a hand pad to work on stubborn stains. Rinse loosened dirt and detergent with plenty of water (setting "0").

The safety advice and instructions for use on the containers, the product information and the safety data sheet must be observed. Please also observe the cleaning and maintenance recommendations of the manufacturers as well as the instruction manual of the machines and equipment used.

Application method

Foam cleaning

Step 6: Cleaning of the floor areas

Use a wet vacuum cleaner to remove the dirty solution or wipe with a squeegee. Turn off water, remove pressure from foam gun. Remove device, rinse and leave to dry.

Step 7: Clean tools

Clean all the required tools thoroughly with water.

The safety advice and instructions for use on the containers, the product information and the safety data sheet must be observed. Please also observe the cleaning and maintenance recommendations of the manufacturers as well as the instruction manual of the machines and equipment used.
